Details of instruments/facilities in Annexure-1

1

@: CARE has rated the aforesaid Upper Tier II Bonds and the Perpetual Bonds after taking into consideration their increased sensitivity to Yes Bank's Capital Adequacy Ratio (CAR), capital raising ability and profitability during the long tenure of the instruments. The rating factors in the additional risk arising due to the existence of the lock-in clause in hybrid instruments. Any delay in payment of interest/principal (as the case may be) following invocation of the lock-in-clause, would constitute as an event of default as per CARE's definition of default and as such these instruments may exhibit a somewhat sharper migration of the rating compared with conventional subordinated debt instruments.

#: CARE has rated the aforesaid Basel III Compliant Tier-I Perpetual Bonds [Additional Tier I Bonds (Basel III)] after taking into consideration its key features as mentioned below:

- The bank has full discretion at all times to cancel coupon payments.
- The coupon is to be paid out of current year profits. However, if the current year's profits are not sufficient, i.e., payment of such coupon is likely to result in losses during the current year, the balance of coupon payment may be made out of reserves representing appropriation of net profits, including statutory reserves and excluding share premium, revaluation reserve, foreign currency translation reserve, investment reserve and reserves created on amalgamation provided the bank meets the minimum regulatory requirements for Common Equity Tier I [CET I], Tier I and Total Capital Ratios and capital buffer frameworks as prescribed by the Reserve Bank of India [RBI].
- The instrument may be written-down upon CET I breaching the pre-specified trigger of 5.5% before March 31, 2019, and 6.125% on and after March 31, 2019, or written-off / converted into common equity shares on occurrence of the trigger event called point of non-viability (PONV). The PONV trigger shall be determined by RBI.

Any delay in payment of interest/principal (as the case may be) due to invocation of any of the features mentioned above would constitute as an event of default as per CARE's definition of default and as such these instruments may exhibit a some-what sharper migration of the rating compared with other subordinated debt instruments.

¹ Complete definition of the ratings assigned are available at <u>www.careratings.com</u> and other CARE publications

Detailed rationale & key rating drivers:

The revision in ratings assigned to Additional Tier I (AT I) bonds of Yes Bank Limited (YBL) factors in weakening of the core capital buffers on account of further deterioration in the credit profile of its advances portfolio. The bank reported Common Equity Tier (CET I) Ratio of 8.0% as on June 30, 2019 (March 31, 2019: 8.4%) as against minimum regulatory requirement of 7.375% as on March 31, 2019 and 8.00% by March 31, 2020 (including CCB of 1.875% and 2.5% respectively). Raising equity capital in the near term to maintain adequate capital buffers over the minimum regulatory requirement as well as fund growth continues to be a key rating sensitivity for the bank.

The ratings continue to factor in the bank's improved funding profile over the last couple of years with stable retail deposits and Current Account and Savings Account (CASA) deposits, adequate operating profitability and liquidity profile. Post the change in MD & CEO, the bank has plans to increase focus on retail lending and granular deposits to diversify risk and during Q1FY20 (refers to period from April 01 to June 30), the bank saw improvement in profitability in spite of elevated credit costs and reported Profit After Tax (PAT) of Rs.114 crore as compared to net loss of Rs.1,507 crore during the quarter ended March 31, 2019 and PAT of Rs.1,720 crore for FY19.

However, the bank has seen deterioration in its asset quality parameters with its Gross NPA ratio increasing to 5.0% (March 31, 2019: 3.2%) and Net NPA ratio increasing to 2.9% (March 31, 2019: 1.9%) as at the end of June 2019. Further, the proportion of bank's exposure to 'BB and below' rated advances increased to 9.4% as on June 30, 2019 as compared to 7.1% as on March 31, 2019 on account of deterioration of credit profile of some of its large borrowers.

The credit costs are expected to weigh on the bank's profitability going forward as indicated by its guidance of 125 bps for FY20 (refers to period from April 01 to March 31) and would also depend on the bank's ability to timely recover from these stressed accounts and limit the provisioning cost.

Improvement in capital ratios, asset quality, profitability, and granularity of advances, stability of management and stability of funding profile are the key rating sensitivities.

Outlook: Negative

The 'Negative' outlook is on account of weakening of core capital buffers to absorb credit costs and deterioration in the credit profile of its advances portfolio. The outlook may be revised to 'Stable' if the bank is able to bring about timely resolution of the identified assets and improve its asset quality parameters along with improvement in its core capitalization levels. Inability of the bank to raise equity capital within reasonable timeline or further deterioration in asset quality parameters would act as a negative rating trigger.

Detailed description of key rating drivers

Key Rating Strengths

Adequate operating profitability

During FY19 (refers to period from April 01 to March 31), YBL saw growth of 34% in total income supported by growth of 27% in net interest income on the back of 19% credit growth. The bank was able to maintain its net interest margin (NIM) at 2.8% for FY19 as compared to 2.9% for FY18 in view of increase in cost of borrowings. During FY19, the bank's non-interest income declined by 12% largely on account of moderation in growth in corporate advances as well as reversal of certain corporate fee income during Q4FY19. The bank's operating profit increased by 5% to Rs.8,135 crore during FY19 as compared to Rs.7,748 crore during FY18. The bank's cost to income for FY19 was at 43.50% (FY18: 40.22%) which remained better than peer banks. On account of higher credit provisioning in Q4FY19 (3.9% on annualized basis including contingency provisions), the bank reported net loss of Rs.1,507 crore in Q4FY19 resulting in decline in Profit After Tax (PAT) for FY19 to Rs.1,720 crore as compared to PAT of Rs.4,225 crore during FY18 showing a decline of 59%.

During Q1FY20, the bank reported PAT of Rs.114 crore on total income of Rs.9,089 crore. The bank reported operating profit of Rs.1,959 crore with provision of Rs.1,784 crore as compared to Rs.2,455 crore with provision of Rs.626 crore during Q1FY19. Going forward, the bank's ability to limit the credit costs will be the key to improve the profitability going forward.

Improvement in funding profile over the last few years

Over last three years bank has seen improvement in its funding profile, with Current Account Savings Account (CASA) now forming 33.1% of total deposits as on March 31, 2019, against 23.1% as on March 31, 2015. While CASA ratio has declined in from high of 36.5% as on March 31, 2018, the CASA + retail Term deposits ratio has increased to 58.8% as on March 31, 2019, from 57.2% as on March 31, 2018. As on June 30, 2019, the bank's CASA proportion stood at 30.2%. The improvement in CASA deposit will remain key to further lowering the borrowing cost for bank as currently CASA ratio is lower as against its private sector banks peers.

Key Rating Constraints

Moderation in capitalization levels

Historically, the bank has been maintaining strong capitalization levels and has demonstrated ability to raise capital which helped the bank to grow its advances portfolio until H1FY19. In the recent period, the bank has not raised equity as a result of which the bank's capital adequacy parameters (especially the core capitalization) have seen a declining trend. The capitalization levels have further been impacted by the sharp increase in credit costs during Q4FY19 resulting in decline in capital buffer to support credit growth and absorb future credit provisioning.

The bank reported Capital Adequacy Ratio (CAR) of 15.7% (Tier I CAR: 10.7%) as on June 30, 2019 as compared to CAR of 16.5% (Tier I CAR: 11.3%) as on March 31, 2019. Although, the overall CAR remained higher than the minimum regulatory requirement of 10.875% (Tier I CAR: 8.875%) (including CCB) as on March 31, 2019 and 11.50% (Tier I CAR: 9.50%) by March 31, 2020, the bank's core capitalisation buffers have seen decline over the last few quarters. The bank reported CET I Ratio of 8.0% as on June 30, 2019 as compared to minimum regulatory requirement of 7.375% as on March 31, 2019 and 8.00% (including CCB) by March 31, 2020.

The Board of the bank has approved raising of equity capital of up to USD 1 billion (approximately Rs.7,000 crore) in one or more tranches subject to shareholder approval. However, raising the equity capital in the near future would be important for the bank and remains a key rating sensitivity.

Moderation in asset quality

During Q1FY20, the bank saw rise in slippages resulting in Gross NPA ratio of 5.0% and Net NPA ratio of 2.9% as on June 30, 2019 as compared to Gross NPA ratio of 3.2% and Net NPA ratio of 1.9% as on March 31, 2019.Over the last two quarters (Q4FY19 and Q1FY20), the bank has reported significant increase in 'BB and below' rated advances which stood at 9.4% of total advances as on June 30, 2019 from 7.1% as on March 31, 2019 and 2.2% as on March 31, 2018 on account of deterioration in the credit profile of some of its large borrowers. During Q4FY19, the bank has created a contingency provision of Rs.2,100 crore for certain performing accounts, which will act as a buffer for any slippages from these accounts of which the bank has used Rs.1,399 crore during Q1FY20. The bank has reported provision coverage ratio of 43.1% as on June 30, 2019. Further, there were no divergences reported by the bank in the risk-based supervision audit by RBI for FY18. Going forward, slippages from the identified assets could adversely impact the profitability of the bank and the bank's ability to timely recover from these accounts and limit the provisioning cost would be a key rating sensitivity.

Majority corporate exposures and concentration risk

Although, the bank has seen decline in proportion of corporate advances and going forward would focus more on retail, the share of corporate advances to total advances continued to remain high relative to peer banks. The proportion of corporate advances has seen decline to 63.9% as on June 30, 2019 from 65.6% as on March 31, 2019 and 67.9% as on March 31, 2018 while the proportion of retail has gone up to 18.3% as on June 30, 2019 from 16.7% as on March 31, 2019 and 12.2% as on March 31, 2018.

The top 10 individual exposures and top 10 group exposures stand at 11.8% and 24.7% of total assets as on March 31, 2019. Any deterioration in these large accounts will have significant impact on bank's asset quality and profitability. Going forward, the bank's ability to improve the granularity of the loan book will be the key to decrease the concentration risk.

Analytical approach: Standalone Liquidity Profile

According to structural liquidity statement as on March 31, 2019, up to 1 year bucket, the bank has negative cumulative mismatch of 6.8%. The bank has access to RBI's LAF and MSF facility in case of any urgent liquidity requirements. The bank reported daily average liquidity ratio (LCR) of 117.3% for Q1FY20 against statutory requirement of 100%. The deposit base of bank has remained stable and continued stability of deposits will be key monitorable.

About CARE Ratings:

CARE Ratings commenced operations in April 1993 and over two decades, it has established itself as one of the leading credit rating agencies in India. CARE is registered with the Securities and Exchange Board of India (SEBI) and also recognized as an External Credit Assessment Institution (ECAI) by the Reserve Bank of India (RBI). CARE Ratings is proud of its rightful place in the Indian capital market built around investor confidence. CARE Ratings provides the entire spectrum of credit rating that helps the corporates to raise capital for their various requirements and assists the investors to form an informed investment decision based on the credit risk and their own risk-return expectations. Our rating and grading service offerings leverage our domain and analytical expertise backed by the methodologies congruent with the international best practices.

Disclaimer

CARE's ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CARE's ratings do not convey suitability or price for the investor. CARE's ratings do not constitute an audit on the rated entity. CARE has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CARE does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CARE have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CARE or its subsidiaries/associates may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CARE is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CARE is not responsible for any errors and states that it has no financial liability whatsoever to the users of CARE's rating.

Our ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
