

The CareEdge Debt Quality Index (CDQI) has seen a rising trend since November 2021. In September 2022, the index moved up further to 92.70 as compared to a level of 92.58 a month ago primarily due to an increase in rated debt in higher rating categories.

About the CDQI Index

CareEdge Debt Quality Index (CDQI) denotes the quality of debt that can be interpreted over time and juxtaposed with other developments in the financial sector. The CDQI captures, on a scale of 100 (index value for the base year FY12), whether the quality of debt is improving or declining. Intuitively an upward movement indicates an improvement in the quality of debt benchmarked against the base year. As it is contemporary with minimum time lags, the health of the debt and credit markets is encapsulated on a near-real-time basis.

The dataset comprises 1,653 companies from our portfolio of 2,980 companies as of March 2012. The dataset is revisited at regular intervals and is replaced suitably with a new set of companies with a similar rating and an approximate volume of outstanding debt rated in case an entity ceases to have a rating coverage. Currently, the volume of debt of the sample companies stands at Rs 46.1 lakh crore in September 2022.
