Overview

The Indian hospitality industry along with tourism continues to be one of the key segments driving the growth of the services sector in the Indian economy. Currently, Indian economy ranks 7th in the world in terms of GDP at 6.8% in FY19. Travel and tourism sector contributes roughly 10% of the country's GDP as per IBEF and Hotelivate, providing employment to about 43 million persons (direct & indirect – ~8.2% of total employment). Also, travel & tourism is the 3rd largest foreign exchange earner for the country. As of 2018, India ranks 3rd as per World Travel & Tourism Council's (WTTC) travel and tourism power ranking¹.

In FY19, the overall occupancy rates (ORs) witnessed an increase of about 100 basis points y-o-y to 66.7% on back of about 12% y-o-y increase in domestic tourist arrivals while foreign tourist arrivals witnessed slower growth of about 2% y-o-y on back of slowdown in major global economies during the year. However, the average room rates (ARRs) increased by about 3.6% to Rs 5,973 per day backed by increased domestic demand, higher leisure spending and limited supply additions during the year. Consequently, the all India revenue per available room (RevPAR) performance of major markets recorded a growth of about 3.8% over the preceding fiscal and reached Rs 3,981 per day in FY19. This rate was last achieved in the year FY09.

Outlook

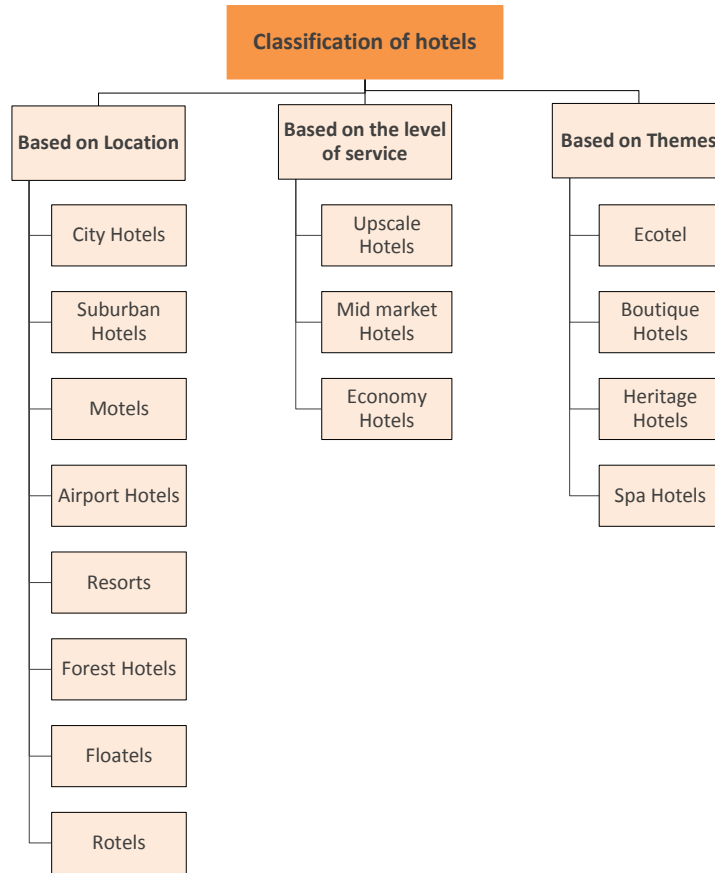

Going forward, CARE expects the industry to register an overall healthy growth in revenue led by lower GST rates and consistently growing middle class along with increasing disposable income. India's attractiveness as a medical tourism destination; steadily growing Meetings, Incentives, Conferences and Exhibitions (MICE) segment; and, an increasing fondness among millennials to travel, is expected to improve demand from both domestic as well as foreign travelers for the sector. Also, the expected future inventory in 11 major markets (across categories - only branded) is lower at around 50,170 rooms for the next 5 years. Therefore, with increasing domestic demand and lower room additions, **we expect the major markets to sustain the average room rates (ARRs) going forward and grow at an average of 3.5-4.5% per annum. Also, we expect the ORs to inch up to an average of about 68-70% by the end of FY22 compared with 66.7% in FY19. Accordingly, the hotel industry is expected to see an increase in room revenue at the rate of about 10-12% CAGR over the next 3 years.**

¹ WTTC travel & tourism power ranking looks at absolute growth of 185 countries across 4 main travel & tourism indicators – GDP, visitor exports, domestic spending and travel & tourism capital investment

Classification of Hotels

The Indian Hotel Industry can be broadly classified under 3 major heads:

Chart 1: Classification of Hotels

Source: CARE Ratings

Other concepts

Timesharing industry

- A timeshare is a form of vacation ownership of property. Units may be on a partial ownership, lease or a ‘right to use’ basis where the sharer has no claim to the ownership of the property. The concept of ‘timeshare’ as an innovative way for increasing holiday choice became popular in Europe in the 1960s. Under this concept, the use and costs of running the property (hotel) are shared among the owners.
- Instead of booking a resort every year for a week or two, or purchasing a property, timeshare offers buyers the ability to buy rights of occupancy in a property, usually in multiples of a week, for a set period. After purchasing their holiday time and using it, they can pass it to their friends and relatives, or rent it out.

The industry offers various purchase options to meet consumers’ requirements for vacation variety and flexibility.

1. Fixed-week: The most common type of timeshare where units are sold for use during a fixed week of the year.
2. Floating week: This could be any week during a certain season of the year.

3. Rotating or flex-week: Under this, in an attempt to give all owners a chance for best weeks, the weeks are rotated forwards or backwards through the calendar, so in year 1 the owner has week 25, then in year 2 the owner has week 26 and week 27 in the week after that.
4. Points Program: Annually, the program gives the owner the points equal to the level of ownership and the owner has the flexibility to use these points as currency to make their travel arrangements.

Timeshare owners have the option to holiday in different resorts if the memberships are affiliated to an exchange company. Resort Condominiums International (RCI) and Interval International are the major players amongst the existing exchange companies.

Service Apartments

- Service apartments are fully furnished apartments available for short-term or long-term stay providing all the luxuries of a premium hotel such as room service, laundry service, fitness centre, etc. and have larger rooms and more space at a far more competitive rate. The apartments are usually equipped with full kitchens, wi-fi and other in-house amenities.
- These apartments are ideal for people who do not have to stay for long durations to set up a home but also long enough to want to live a normal life while experiencing luxuries of a 5-star hotel. Also, no rental deposits are required in this case unlike ordinary residential leases which typically binds people for a year or and involve an 11 month rental deposit.
- Business professionals, executives who may be on local or international work assignments (project related) are frequent users of this facility. However, they are available to general public as well.

Although this concept is picking up in some business destinations, we at CARE Ratings do not see it becoming a threat to the demand for existing premium segment hotels, as the average length of stay (ALOS) in hotels is still lower at 2-3 days and are preferred over service apartments.

Operating models

Chart 2: Operating models

Source: CARE Ratings

Classification of Customer segments

1. Business traveller

- The business traveller is a businessman or a corporate executive travelling for business purposes. This segment includes corporates, both domestic and foreign. This practice is on a rise due to the economic upswing in India. It can also be attributed to the increased business opportunities internationally.
- The business travellers can be divided into two categories based on their duration of stay; first, the business traveller who travels for a short duration. These travellers come mostly for a meeting or a conference. They are time-conscious and willing to be price-insensitive. Such customers are ready to pay higher price in exchange for flexibility of being able to book a room at the last minute.
- The other category is the business traveller who travels for a mid-to-long-term duration. They travel mostly for working on a project. Such customers may or may not have a pre-planned journey; therefore, they may or may not be price sensitive. Nowadays, such people prefer serviced apartments.

2. Leisure travellers

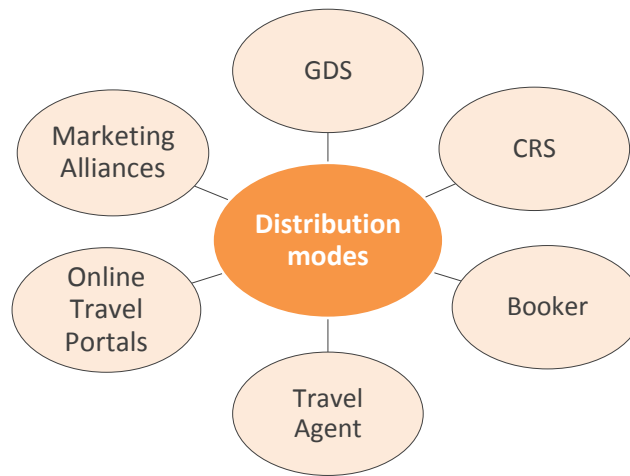

- The leisure traveller could either be a foreigner or a domestic traveller whose primary purpose of visit is holiday or site seeing. Among non-business foreign tourists, the primary motivation for visiting India is largely cultural attraction followed by conferences and conventions, tourist attractions like beaches, wild life, hill resorts, etc.
- Usually, leisure travellers are part of a package run by a tour operator. Their duration of stay varies from short to medium term. Such customers are price-sensitive and are willing to give up some flexibility for the sake of a more inexpensive room.
- Most of these travellers are domestic travellers. Due to growing economy and rising income levels, the number of such travellers is increasing.

3. Airline Cabin Crew

- Airline cabin crew forms another important segment because of the repetitive and guaranteed nature of the business that they provide.
- Usually, these are a part of an annual contract whereby, in return for a fixed rate, a certain number of rooms are provided on demand for cabin crews with discount rates in the range of 40% and 50%, this represents a low-yield segment for hotels in general.

Distribution channels

Industry characteristics

The industry can be classified as business and leisure destinations from the point of view of the hospitality sector. It should be noted that the two are not mutually exclusive as some locations have a fair mix of business and leisure travellers. The demand dynamics are quite different for both the segments.

Cyclical

The hospitality industry is cyclical in nature. i.e., during positive cycles the industry witnesses periods of sustained growth and sees healthy average room rates (ARRs) and occupancy rates (ORs). Until the economy goes through a downturn or if there is excess supply, the trend continues. When recession sets in, the ORs begin to decline followed by the ARR. In the recovery phase, ORs starts to move up and eventually the ARR also start to increase.

While the macro-economic factors affect the business destinations (RevPARs – revenue per available room, growth is sensitive to the macro-economic indicator such as the nominal GDP, inflation, lending rates, etc), the leisure destinations show a greater sensitivity to non-economic factors such as terror attacks, health related travel warning, etc. (decline in FTA in FY09 was largely on account of the Mumbai terror attacks on November 26, 2008 and the swine flu linked travel advisories). Consequently, the average RevPARs of 11 major cities had registered a decline of about 16.3% in FY09 and 16% in FY10. While in FY11, with higher growth in nominal GDP and an increase in FTAs post-recession, these 11 major cities recorded an average increase of about 2.2% in RevPARs. Similarly, due to increased domestic and international trade activities and various initiatives taken by the government during FY16, the number of foreign travellers in the country has increased. This has been reflecting in the overall RevPARs in India that registered a CAGR growth of over 4% between FY14 and FY19.

Seasonality

The hotel industry demand is seasonal in nature. Though the peak season for both business and leisure destinations is the same (January – March), during the remaining year both demonstrate different behaviours. While the business destinations maintain constant ORs (5-10% lower than Jan-Mar period) from April – November. However, in December, a sharp correction is witnessed in the business destinations as it coincides with the international holiday period. Leisure

destinations on the other hand register lower ORs during May - October period, while the occupancy rates improve in December on account of holiday season.

Chart 4: Seasonal nature of hotels industry in India (Occupancy rates - %) – FY18

Source: FHRAI

Average length of stay (ALOS)

The demand for hotel rooms in business destinations is usually concentrated around weekdays, i.e., the ORs are generally lower on weekends. The ALOS for business hotels is usually in the range of 2-2.5 nights with low levels or double occupancy (fewer occasions where more than one person shares the room). While the hotels in leisure destinations the ORs are higher during the weekends and have ALOS of around 2-3 days. The occurrence of double occupancy is also typically higher in leisure destinations.

Existing Inventory

The upscale segment of the hotel industry in India is highly organized and concentrated in few key cities. The total number of ‘keys’ (rooms) in the top 11 key cities covered by CARE Ratings is estimated at 94,544 as at the end of FY19. Of this, about 53% of the room inventory is concentrated in NCR, Bengaluru and Mumbai.

The existing room supply for the country grew by 5.4% y-o-y in FY19 totaling to 133,359 rooms (as of March 31, 2019). This considers the 5,132 new rooms that entered various markets in H2 FY19, as well an expansion of the existing properties that are operational for less than 6 months.

Table 1: Existing inventory (Major cities and across categories – Only branded)

Sr no.	City	Existing inventory at the end of			Y-o-Y Growth	CAGR FY14 – FY19
		FY14	FY18	FY19		
1	NCR *	18,799	21,855	21,974	0.5%	3.2%
2	Bengaluru	10,162	12,594	14,287	13.4%	7.1%

Upcoming Supply

The future supply landscape is ever-changing and subject to several external forces that may often delay project openings. It is noteworthy that the pipeline for proposed supply totaled 114,466 rooms back in FY08 – the highest in a decade, whereas in FY19 it contracted significantly to just 50,170 rooms

Table 3: Proposed Branded Hotel Rooms across Major Cities and Categories (FY19 – FY24)

	Existing Supply (FY19)	Proposed Supply*	Increase in Future Supply	Luxury	Upscale	Upper-Midmarket	Mid-market	Budget
Agra	2,125	582	27%	0.0%	34.4%	0.0%	45.4%	20.3%

Note: *Proposed Supply includes 5,132 rooms which have been open for less than six months, and therefore, not included in the existing supply

Source: Industry, Hotelivate

Performance of major markets in India (11 cities)

The overall average Occupancy rates (ORs) increased by only about 100 basis points y-o-y during FY19 in 11 major cities in India. ORs increased from 65.7% in FY18 to 66.7% in FY19 on back of increased demand mainly from domestic travelers for business and leisure activities. Of this, leisure spending by domestic travelers accounted for about 95% of the total contribution to India's direct travel & tourism GDP 2018. Foreign tourist arrivals witnessed slower growth during FY19 on back of slowdown in major global economies during the year and foreign visitor spending accounted for just about ~13% of the total spending during the year. However, the average room rates (ARRs) increased by about 3.6% during the same period to Rs 5,973 per day on back of increased demand and limited supply additions during the year. This increase in ORs and ARRs led to the all India RevPAR performance of major markets to record a growth of about 3.8% over the preceding fiscal and reach Rs 3,981 per day in FY19. This rate was last achieved in the year FY09.

Occupancy rates (OR):

ORs for 2 star and 3 star hotels witnessed the sharpest growth of about 370 and 230 basis points y-o-y during FY19. This was followed by 5 star D hotels that registered a growth of about 200 basis points. 4 star hotels witnessed a lower growth of only 60 basis points y-o-y while ORs of 5 star hotels remained largely stable and witnessed only a marginal increase of about 10 basis points on a y-o-y basis.

Chart 5: Performance of Hotels – Overall average

Source: Hotelivate

Average Room Rates (ARR):

Similarly in case of average room rates, 2 star hotels witnessed the maximum growth in the group increasing by over 11% y-o-y during FY19. This was followed by 3 star hotels that registered a growth of about 5.1% y-o-y in FY19. 5 star and 5 star D hotels recorded a growth of 3.9% and 3% y-o-y each in average room rates. 4 star hotels, however, registered the lowest growth about 2.3% y-o-y in the group during the year. This may be attributed to the gradual escalation of commercial activity in Tier II and Tier III cities as well as increased domestic travel.

RevPAR:

Each star category witnessed a y-o-y increase in RevPAR in FY19, with the 2 star category leading the pack, recording a sharp growth of 14% during the year. The improvement in RevPAR across all star categories can be attributed to both occupancy and average rate.

Chart 6: ARR, RevPAR and OR (FY18)

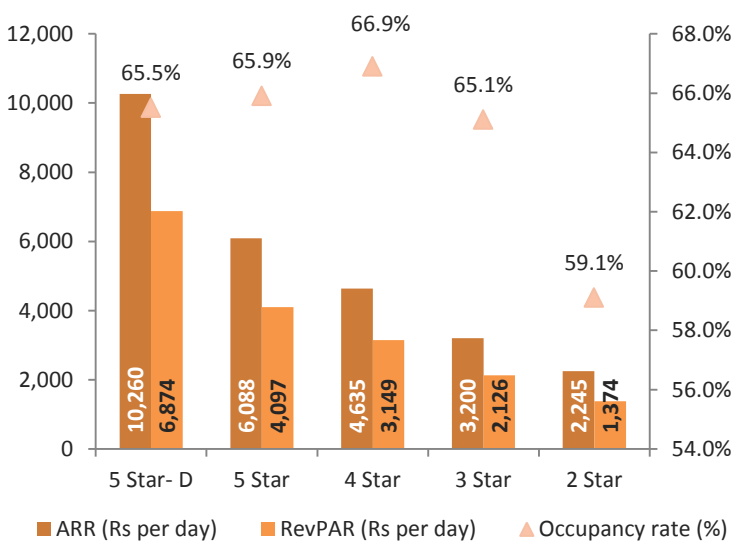

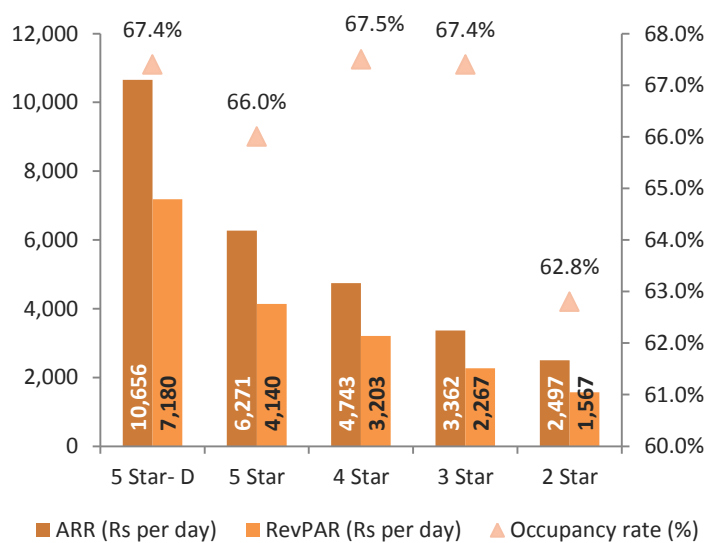

Chart 7: ARR, RevPAR and OR (FY19)

Source: Hotelivate

The expected future inventory in 11 major markets (across categories - only branded) is lower at around 50,170 rooms for the next 5 years (FY19 to FY24). Therefore, with increasing demand on back of improvement in economic activities and lower room additions, ***we expect the industry to sustain the average room rates (ARRs) going forward and grow at an average of 3.5-4.5% per annum. Also, we expect the occupancy to inch up to an average of about 68-70% by the end of FY22 compared with 66.7% in FY19.***

City-wise performance – FY19

1. Mumbai

- Business travellers account for about 80% of the total room demand in the city.
- Mumbai's hotel market once again outpaced all other major markets across country and recorded the highest occupancy (77.1%) as well as highest average room rates (Rs 8,096 per day), further consolidating its position as the best performing hotel market in terms of RevPAR too. This was primarily backed by strong growth in corporate travel from industries such as BFSI and IT/ITeS along with an upswing in meetings, incentives, conferences and exhibitions (MICE) demand in major commercial hubs such as BKC, Powai, Goregaon and Airoli, CBD Belapur in Navi Mumbai and the promising growth in the Extended-Stay segment – have favourably impacted Mumbai's hotel market
- In terms of future supply, Mumbai is expecting an addition of about 4,816 rooms by FY24. Of this, about 33% supply is expected in the luxury space while the remaining is mostly in the upper-mid-market and budget category.

2. Bengaluru

- Business travellers constitute about 80-85% of the premium segment room demand in Bengaluru. BFSI and PSU companies mainly account for room demand in CBD area while Whitefield and Electronic city areas have demand from IT/ITeS companies
- Hotels in Bengaluru witnessed a surge of 5.2% in marketwide RevPAR in FY19, driven mainly by the higher room rates during the year. The city's hotels exhibited an increase of about 9% y-o-y in average rates and reached Rs 6,339 per day. The fact that the resilient market performance was accompanied by a 13.4% y-o-y growth in supply bodes well for the city that is expected to add approximately 4,620 rooms in a phased manner over the next 5 years.

3. NCR

- Business travellers account for about 70-75% of the demand while the remaining comes from the leisure travel demand. Demand mainly comes from the BFSI and PSU segments in Delhi while in Gurugram, IT/ITeS, BPO and telecom sector drive demand. Hotels in Noida region majorly cater to demand from IT, BPO and consumer durables companies. Aerocity district caters to demand from corporates, MICE activities and transient clients. Social events – marriages also contribute to the room demand in NCR. The demand previously catered to by the unorganised sector in the area has been absorbed by the branded mid-market and budget hotels located within the district.
- NCR is home to the largest branded hotel market in the country. New Delhi continued to record a y-o-y growth of about 8.5% y-o-y in RevPAR despite opening of two large hotels (an addition of about 470 keys), while Gurugram and Noida witnessed a growth of over 5% and 25% respectively in FY19 after declining in FY18 due to supply pressure.

- NCR is expected to witness an addition of about 3,594 rooms in the next five years, with maximum rooms (~1,800) expected in Gurugram alone.

4. Chennai

- 85% of the room demand in Chennai comes from business travellers.
- Demand in CBD area comes mainly from BFSI and PSU companies, IT/ITeS companies drive demand in the OMR region. Proximity to electronics and the auto industry players in and around the Sriperumbudur area, makes hotels near airport area attractive for business travellers
- It also enjoys demand from other major business sectors including manufacturing, port and port-related activities, the government and embassies, etc along with a growing MICE demand base owing to the recent expansion of room inventories including large-scale meeting facilities in the city
- Despite an increase of about 9% in supply in FY19, the market continued on its path to recovery with room rates registering a y-o-y growth of about 3.7% y-o-y and recorded the highest RevPAR growth of about 7% in last 12 years.
- Going forward, only about 400 rooms are expected to be added to Chennai market in the next 5 years.

5. Pune

- Demand from business travelers account for about 90-95% of overall demand in the city for premium hotels.
- In addition to serving as a manufacturing hub in Western India, the city has developed into an important IT/ITeS centre. Availability of large commercial floor plates along with a young and educated workforce has driven the rapid development of the city. Proximity and ease of connectivity to Mumbai, the country's financial capital, has also helped the city
- In the past few years, a staggering increase in room supply resulted in a downward spiral in both occupancy and average rate performance which overshadowed the y-o-y double-digit growth in demand, and questioned the strength of the market
- However, the silver lining is that the slowdown in new supply coupled with the robust and continuous increase in demand has helped the city's hotels perform well in occupancy. Occupancy rates registered a slower expansion of about 200 basis points during FY19 largely due to subdued performance of auto industry and restricted travel during the year. Average room rates, however, witnessed an increase of about 7% y-o-y leading to a sharp growth of about 10% y-o-y in RevPAR during the year.

6. Ahmedabad

- The city has lately attracted substantial investments and industries. Ahmedabad market witnessed healthy RevPAR growth of over 10% led by about 10% y-o-y higher average room rates during FY19 on back of number of new commercial and industrial developments taking place both within the city and on the outskirts, generating demand mainly for commercial, extended-stay and MICE segments. Occupancy rates, however, remained largely stable and witnessed a negligible growth of about 30 basis points during the year
- With the city hosting multiple mega events and festivals, a large amount of leisure demand is also generated
- Around 2,000 rooms are expected to be added to the Ahmedabad market by FY24.

7. Hyderabad

- About 85-90% of premium segment hotel demand comes from business travellers led by MICE activities in the HITEC city.

- CBD area room demand is primarily dominated by business travel segment from sectors such as BFSI and PSU companies while the Hitech city caters to demand from IT/ITes.
- Corresponding to the rebound in commercial activity, the Hyderabad hotel market witnessed an expansion of about 400 basis points in occupancy rates and the average rates increased by about 6% y-o-y in FY19. With opening of Grade-A commercial spaces and major global conglomerates setting up office in HITEC city, demand has been on the upward trajectory
- 730 rooms are expected to be added to the existing supply between FY19 and FY24.

8. Kolkata

- About 75% of room demand for premium segment comes from business travellers.
- Kolkata is driven primarily by commercial activity emanating from PSUs, PSBs, manufacturing, IT/ITes, engineering, medical activity and the telecom industry
- In FY19, Kolkata witnessed negligible change of about -0.9% y-o-y in average room rates, while the RevPAR remained unchanged. Post the increase in room supply in the last few years, the city ORs managed to be over 70% and the average room rates reached Rs 5,853 per night
- The MICE activities has been the major contributor of incremental demand with its connectivity to domestic as well as international destinations, improved infra and shift of demand from unorganised to branded hotels supporting the demand in the city.
- Kolkata market is expected to add about 1,700 rooms between FY19 and FY24

9. Jaipur

- Popularly known as the 'Pink City' and an integral part of the Golden triangle itinerary, Jaipur's rich culture and its spectacular forts, palaces, and havelis continue to attract tourists from all over the world, making it one of the top leisure destinations in the country.
- Lately, the city has become a major MICE destination, primarily known for its destination weddings and large scale conventions
- In FY19, the city witnessed about 5% growth in room supply. Despite the increase in supply, the city average room rates reached Rs 5,296 per night (5% y-o-y increase) while ORs remained largely stable at 67.9% (y-o-y expansion of about 50 basis points). In line with the ORs and ARR, RevPARs registered about 5.4% y-o-y growth during the year.
- Going forward, about 2,600 rooms are expected to be added to Jaipur hotel market in the next 5 years

10. Goa

- Goa continued to exhibit largely stable average room rates of Rs 7,912 per night during FY19 (the second highest after Mumbai), Occupancy rates reached 71.8% during the year (expansion of about 200 basis points) leading the RevPARs to witness an increase of about 2.4% y-o-y.
- However, Goa continues to face competition from beach destinations in South and Southeast Asia
- The up-tick in the occupancy can be attributed to the improved domestic leisure travel and the booming MICE (wedding business).
- Recently, Goa's position as the most preferred getaway spot in India has been impacted on back of various measures taken by the government such as banning alcohol consumption on the beaches to imposition of long list of 'dry days'. Marginal shift in demand to travel destinations like Sri Lanka, Istanbul and Thailand (comparable in terms of costs) has been witnessed in the past couple of years

- The proposed Mopa Airport is further expected to make significant demand contribution
- Going forward, about 2,068 rooms are expected to be added to Goa market by FY24

11. Kerala

- Room demand in Kerala is driven by both leisure and business travellers, each accounting for 50% share
- Kochi is known as the commercial capital of Kerala comprising of shipbuilding and port operations, chemicals, spices, construction, fertilizers and IT industries. Also, large oil corporations such as Indian Oil Corporation, Bharat Petroleum and Hindustan Petroleum have plants located at Irumpanam, a suburb of Kochi
- Trivandrum comprises of industries such as IT and medical
- Apart from this, leisure travellers also drive room demand in Kerala
- Demand in the state was affected due to health advisories in May 2018 followed by severe floods and airport closure during August-September 2018. Also, the ripple effects were felt for a few months post that with hotels being shut for maintenance work caused by unusual flooding while demand moved to neighbouring destinations such as Sri Lanka, Thailand, etc.

12. Agra

- Room demand is usually driven by leisure travellers
- Any macroeconomic conditions have an impact on demand in tourist destinations such as Agra where FTAs constitute majority
- In FY19, OR registered an expansion of over 120 bps to reach 67 %, city's highest in over 20 years. Also, despite competition from the branded mid-market segment, the room rates witnessed an increase of about 7.7% y-o-y to average at Rs 5,726 per night. This higher occupancy/demand translated into a growth of over 9% in RevPARs during the year.
- In FY19, the city continued to witness decline in the FTAs, which was cushioned by the increase in DTAs led by introduction of the Gatimaan Expressway, Yamuna Expressway and the Agra-Lucknow Expressway, improved rail-road connectivity to NCR, Lucknow and neighbouring cities that has increased the demand from MICE segment and individual domestic leisure travellers.
- Going forward, only about 580 rooms are expected to be added to Agra market by FY24

Tourism

Table 4: Foreign & Domestic tourist arrivals

(Numbers)	FY17	FY18	FY19
FTA	9,152,985	10,386,305	10,594,669
Growth (%)	11.0	13.5	2.0
(in lakhs)	CY16	CY17	CY18
DTA	16,136	16,575	18,549
Growth (%)	12.7	2.7	11.9

Source: Ministry of Tourism

A. Domestic Tourists

Domestic tourist arrivals (DTA) are the tourists within India who travel to different places both for business and leisure purposes. The domestic tourist arrivals grew by a marginal 2.7% y-o-y from 16,136 lakhs in 2016 to 16,575 lakhs in 2017. In CY18, DTAs witnessed a sharp double-digit growth of about 12% y-o-y to 18,549 lakh travelers. The growth in the domestic tourist arrivals can be attributed to the, rising disposable income, popularizing weekend culture, the eagerness to spend amongst the youth, government campaigns, introduction of low-cost airline services, connectivity by rail and road as well as by air to smaller cities, increased trade and growing service sector. The travel to religious places like the Golden Temple, Vaishno Devi and Tirupati amongst many and travel to leisure destinations like Goa, Shimla, Agra, Kerala, Jaipur etc. also are the key growth drivers for hotels in the upscale category. Coupled with this, marriage at traditional locations amongst the rich and the royal families is also a key growth driver for the upscale and heritage hotels in India, especially in Jaipur, Jodhpur and Udaipur.

Cities like Mumbai, Bengaluru and Delhi hosts both, business and leisure tourists but the share is skewed towards business travellers. However, Tamil Nadu receives mostly leisure and medical tourists. Uttar Pradesh which boasts of the Taj Mahal is a preferred destination for the leisure tourists. Tamil Nadu, Uttar Pradesh and Karnataka witnessed highest DTA flow during CY18.

Domestic travellers continue to be the majority generators of room night demand in India. It is imperative to highlight that the domestic spending accounts for about 87% of the overall spending as contribution to India’s direct travel and tourism GDP as of 2018, while foreign visitor spending accounts for the remaining 13%, in terms of leisure spending, the segment accounts for about 95% of the share while business spending accounts for meagre 5%. *Going forward, with the rise in spending by domestic travellers, domestic demand is also likely to grow at a healthy pace.*

Chart 8: State-wise DTA (in Lakhs)

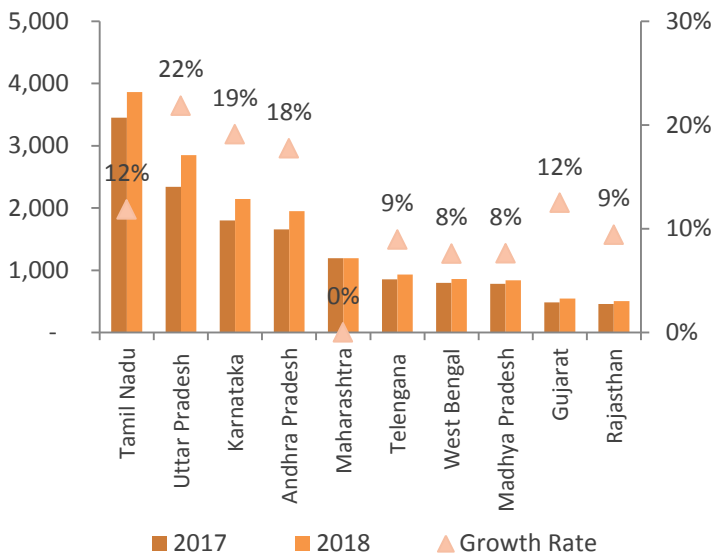

Chart 9: State-wise Percentage share of Total DTA - 2018

Note: Top 10 States

Source: Ministry of Tourism

B. Foreign Tourists

Foreign tourist arrivals (FTA) are the tourists that come and stay in India for a period exceeding 24 hours. Of the Top 10 countries, tourists from Bangladesh accounted for about 21% while from USA and UK accounted for approximately 14% and 10% respectively of the total foreign tourists flowing into India in CY17. Of the Top 10 states, Punjab has seen the highest growth of about 68% in FTA arrivals followed by Goa and Uttar Pradesh. Tamil Nadu witnessed highest FTA arrivals, although y-o-y growth was only 3% due to high base effect followed by Maharashtra where the y-o-y growth was about 9%.

Chart 10: State-wise FTA (in Lakhs)

Chart 11: State-wise Percentage share of Total FTA

Note: Top 10 States
Source: Ministry of Tourism

On a y-o-y basis, the FTAs in CY18 increased by just about 2% y-o-y to 10.5 million. This has been the slowest growth in the last 5 years largely due to weakness in the major global economies during the year. However, various Government of India (GoI) initiatives such as introduction of e-visa in November 2014, development of rail & road infrastructure, along with promotion of medical and cruise tourism has supported the growth of FTAs in the country. In June 2016, the Indian government approved 150 countries under the Visa on Arrival scheme to attract additional foreign tourists. Electronic tourist authorisations, known as E – Tourist Visa, launched by the Government of India have resulted in increase in number of tourist visa issued in the country. The facility has been extended to citizens of 166 countries, as of December 2018. Tourists through e-visa registered an increase of about 180% during 2014-2018 period to reach about 2.4 million tourists as of 2018. In 2019 (Jan-May), 1.2 million tourists have arrived through e-visa facility. (Source: IBEF).

Foreign exchange earnings (FEEs) (in rupee) increased by 9% y-o-y in CY18 while in dollars, FEEs increased by about 4.1% from \$27,448 billion to \$28,562 billion. The lower growth in dollar terms can be attributed to about 5% y-o-y depreciation of rupee against the dollar during the period.

Chart 12: Foreign Tourist Arrivals (FTAs) Trend (in millions)

Source: Ministry of Tourism

The FTAs are expected to reach a level of 12-13 million by CY20, the key growth drivers for growth in FTAs flowing into India include increasing international trade, multinational companies setting up their operations in India, strong share of India in the global IT/ITeS sector, increasing number of airports and airline connectivity with all prominent locations across the globe and increasing tourism campaigns by the Government of India both at the central and state level.

Challenges faced by Hotels

1. Government approvals and licenses

- Major issues for most of the industries in India are related to multiple windows of clearances, even for the hotel industry. Hoteliers face regulatory constraint at every step in the process of development of hotels beginning from land acquisition stage (for which laws differ from state-to state) to approval by various ministries & association on various matters.
- A company requires approximately 100 clearances for setting up an upscale category hotel in India. The clearances have to be taken from multiple government bodies. It is tedious and a time-consuming process.

2. Land availability and cost issues

- The process of identifying new land parcels as per the requirement for hotels is a tedious task in India. Compared to international standards, where land costs accounts for 15-20% of the total project cost, in India this is often in the range of 40-50%. This is also one of the reasons for low development of budget & mid-market hotels in comparison to upscale luxury hotels as budget hotels with lower average rates are unlikely to become viable with such high land cost. As a remedy to the problem, hoteliers have started mixed-use development projects comprising hospitality, commercial, residential and retail components.

3. Human Capital

- Indian hotels face the continued challenge of shortage of trained employees, especially at the manager and supervisor levels. Most of the companies are falling short of skilled employees for their hotels. Major reason for this shortage is absence of organized training and educational institutes for development of skilled employees like in aviation and other service sectors. Only few major Indian players like Taj, Oberoi and ITC have set up their training institutes with a few international brands like IHG, Carlson etc. Also, hotel and catering management

institutes approved by All India Council of Technical Education (AICTE) is less than adequate and much of the talent graduating each year is unsuited for direct employment in the industry due to lack of required skills.

- Retaining the workforce even through training and development in the hotel industry is a tedious task as attrition levels are too high. One of the reasons for this is unattractive wage packages. Though the industry has been growing at a fast pace, hotel management graduates opt to join other sectors like aviation and catering services where they are paid higher.

4. Management Contract related issues

- Performance clause in management contracts is one of the most debated clauses between owners and operators of the hotel. It is most often the only clause that provides a window for an owner to terminate the management contract with the brand. However, unlike in other industries where a client has the choice to reject/ discontinue a product/ service if he/she is dissatisfied with the performance, hotel owners do not enjoy such a privilege and in turn have to pay a hefty termination fee to disengage with the operator.
- Also, owners are seldom informed/ involved in the hotel operations. Non-involvement of owners in hotel operations and lack of transparency can result in a gap for desired objectives. Such non coordination between owners and operators pose a threat to the industry.

Emerging market trends

Indian Online Travel Market

India's total internet subscribers' base as of August 2019 stood at about 615 million. The penetration of internet stands at over 40% which is comparatively lower than developed markets like the United States and the United Kingdom but is growing at a much faster rate. India's e-commerce market was worth about \$2.5 billion in 2009, it went up \$38.5 billion in 2017. Approximately about 75% of this is travel related. Also, as per the telecom regulator Trai, at the end of August 2019, India had 1,171 million wireless subscribers. With this increased emergence of smartphone in India, providing an easy access to internet and various applications, it is readily becoming a major source of travel bookings including hotel bookings.

Online Travel Market has always been predominantly known for Air Ticketing followed by Rail Ticketing. However, with the infusion of global travel brands, increased number of internet savvy people and large number of new hotel openings by various national and international brands at different domestic locations, online hotels and package bookings has emerged as a prospective opportunity for both online travel companies and hoteliers. In addition to online air ticketing, online hotel bookings has become a major revenue contributor to the online travel company in the recent past.

Going digital

The Indian Ministry of Tourism has started using social media to promote tourism sites throughout the country. It joined Facebook in January 2013. 70% of all 4 and 5 star hotels in first tier cities in India had established their presence in social media by August 2013. Leading Indian airline Jet Airways put social media at the centre of its marketing, involving 10 different departments in its social media activities targeting consumers.

A considerable increase has been seen across all star categories in reservations using Online Reservation Systems, hotel/chain websites and Chain CRS (central Reservation System), with the All-India average increasing from meagre 10.3%

in FY13 to 31.2% in FY18. At the same time, Direct Enquiries or reservations made through Hotel Representatives, Travel Agents and Tour Operators (still accounting for about 50% of the total reservations) have declined significantly over the past few years. In keeping with the growing importance of maintaining a positive and impactful online presence, hotels have redirected their marketing efforts towards digital marketing mediums. Hotels are now using their Hotel Website to reach customers where marketing media measures such as Pay per Click increased to 17.4% in FY18 and Promotions have gone up to 75% in FY18 vis-à-vis 67.3% in FY13.

Also, for payments, credit card sales account for the largest share in the all India average with about 37.5%, followed by cash sales at 27.6% as of FY18. Credit sales (other than cards) stand at about 19.3% while ETF (Electric Fund Transfer) accounts for about 15.7% as of FY18.

Financial Performance

CARE has analysed the basic revenue and cost structure of the organised hotel industry in India. After declining by about 2.4% in FY18, net sales (revenue) of the industry witnessed a y-o-y growth of about 3.5% in FY19. Revenue registered a marginal CAGR growth of about 0.5% for the 3 year period between FY17 and FY19. While the hospitality industry demand slowdown was generally due to slowdown in the economy during FY18, the decline in net profits was largely led by one company in the set that recorded an exceptional loss during the year. However, during FY19, demand for hospitality industry improved on back of demand from domestic travelers and increased MICE activities during the year. Also, with GST implementation and processes in place, the industry sentiment remained optimistic.

Table 5: Industry Sales and Margins

53 companies	Rs crore			Growth rates (%)	
	FY17	FY18	FY19	FY18	FY19
Net sales	9,931	9,691	10,030	(2.4)	3.5
Operating Profits	2,405	2,276	2,313	(5.3)	1.6
Operating Profit Margin (%)	24.2	23.5	23.1		
Net Profits	416	178	423	(57.4)	138.3
Net Profit Margin (%)	4.2	1.8	4.2		

Note: The industry margins are based on the financial results of 56 listed hotels, restaurants and resorts
Source: AceEquity

Going forward, the sentiments look positive and demand is expected to pick up on back of increased industrial and social activities in the domestic market, lower GST rates and increased fondness of millennials to travel resulting in higher movement in the MICE segment. ***We expect the momentum to pick up and the industry to register a growth of about 6-8% in revenues for FY20.***

Revenue and Cost structure of Hotels

Revenues in hotels can be classified under three broad headers - room revenue (revenues received as room tariffs), food & beverages (F&B) revenue and other revenue. While the room revenues are a direct function of room rates and occupancy rates, the F&B revenues comprise revenues from restaurants and banquets/convention centres. Other revenues mainly consist of income from auxiliary services provided by the hotel such as laundry, spa services, telephone services and transport. In terms of expenses, employee cost is the largest cost component for hotels.

Room revenue:

The total room revenue for a property can be calculated as:

Room revenue = Room nights sold * Average room rate,

Where, Room nights sold = No. of rooms * Occupancy rate * No. of days (Time period)

Generally, the revenues from rooms constitute about 50 – 55% of total hotel revenues.

F&B Revenues:

It includes revenues from restaurants and banquets. Usually the revenues from F&B division are about 35-40% of the total hotel revenues. It depends on various factors such as occupancy rates of the property, size of banquets and conferences, connectivity and technology in the banquet area, hotel location, etc

Other revenues:

Other revenues include revenues from telecom services, spa services, dry cleaning and laundry services and transport facilities offered by the hotel. These revenues usually constitute about 10-15% of the total hotel revenues.

In FY17, the Rooms Revenue witnessed an increased contribution of 53.6% y-o-y to the total revenue. On the other hand, contribution from Food & Beverage and Banquets declined to 39.5% from 41.5% recorded in FY16. The contribution of the other operating departments has remained range-bound for the past few years.

Chart 13: Revenue structure

Source: FHRAI

Chart 14: Cost Structure

Source: AceEquity, CARE Ratings

Employee costs are one of the largest cost components of the hotels accounting for about 25-30% of the total expenditure. Hotels therefore have large fixed costs and marginal costs per additional guests are comparatively low. Selling & distribution (S&D) costs account for about 15-20% of the operating costs which includes advertising expenses and marketing costs. Power & fuel account for 8-10%. Also, the F&B consumes about 10-15% of the costs on an average. Other operating costs account for the remaining 35-40% of the costs that include the repairs and maintenance, travelling expenses, etc. among others.

Investments

- In Union Budget FY20, the outlay for tourism and culture ministries saw marginal increase of 1.8% and 7% respectively. For building tourism infrastructure and for promotion and publicity, an allocation of Rs 1,379 crore and Rs 575 crore respectively has been made. For the culture ministry, an allocation of Rs 875 crore has been made for central schemes and projects. Also, the Finance minister proposed to develop 17 prominent tourist sites into Iconic Tourism destinations. Out of 17 iconic tourism sites, 7 are being developed to enhance visitor's experience (both domestic & foreign travelers) along with modernization of railway network that is expected to increase tourism and benefit the room demand in those locations
- The tourism and hospitality sector is among the top 10 sectors in India to attract the highest Foreign Direct Investment (FDI). Under the automatic route, 100% FDI is allowed for tourism and hospitality industry in India, subject to applicable regulations and laws
- Also, 100% FDI is allowed in tourism construction projects, including the development of hotels, resorts and recreational facilities in India
- During the period April 2000-March 2019, the hotel and tourism sector attracted around US\$ 12.35 billion of FDI, according to the data released by **Department for Promotion of Industry and Internal Trade (DPIIT)**.

GST implications on Hotel industry

In September 2019, the GST Council lowered the tax to 18% from the earlier 28% on hotel rooms with a tariff above Rs 7,500. Rooms with tariffs between Rs 1,000 and Rs 7,500 will now attract 12% tax rate from the earlier rate of 18% and rooms with tariff below Rs 1,000 have been exempt from any GST

Table 6: Revised GST rates for Hotels and Restaurants (Applicable as of October 1, 2019)

Services	Pre GST Regime		Post GST Regime
	Central Taxes	State Taxes	
A/c or non a/c restaurant (standalone or chained)			5%^
Restaurant located within a hotel with room tariff over Rs 7,500	15% on service component^^	12.5% for food bill	18.0%*
		20.0% for alcohol bill	
Accommodation in hotels, guest houses, etc. where room tariff is less than Rs 1,000 per day	-	-	Nil
Accommodation in hotels, guest houses, etc. with room tariff between Rs 1,000/- and Rs 7,500/- per day	9%	10%	12.0%^
Accommodation in hotels, guest houses, etc. where room tariff is above Rs 7,500/- per day	9%	10%	18.0%^

Note: ^Without input tax credit

*With input tax credit

^^ Considered to be 40% of the bill amount + service charges.

Source: CBEC

The GST on restaurants in 5 star and luxury hotels continues to be 18%, with a provision of input tax credit. Food & beverages form 30-40% revenue for 5 star hotels.

With GST rates now at 18% for premium hotels (room tariff above Rs 7,500 per day), average room rates are expected to improve going forward, as the industry had seen some moderation in FY18 for 5D & 5 star hotels post initial implementation of GST rate of 28% for such hotels.

- Under GST regime, the overall tariffs for premium hotels (four star and above) may see a decline, which may have further positive impact on the demand which had seen a pick-up in the last financial year.
- Further, the practice of bundling of meals with room tariffs may see a decline, especially for 4 star and above category hotels, as higher tariffs above the stipulated levels of Rs 7,500 per day may attract higher tax rates.
- Hotels having centralized registration will have to get registered in each state whether providing hotel services on own account or through agent (franchise)
- The biggest relaxation for the industry is the ease of compliance for the industry as there would be no different taxes for the different services provided by the industry.
- GST would benefit the industry by the input credit system by reducing the overall tax flow for the industry, as earlier they did not have the option to set-off the taxes already paid on inputs of the industry.
- Also, the slashing of GST on restaurants to 5%, it is expected to have a positive impact on the footfalls and increase the propensity of dining out

Outlook:

- Going forward, CARE expects the industry to register an overall healthy growth on back of economic growth due to recovery in the global conditions resulting in higher movement in the MICE segment and consistently growing middle class along with increasing disposable income, growing air connectivity and improving road infra. There are various other key factors that drive the market, including India’s attractiveness as a medical, rural, pilgrimage and eco-tourism destination; steadily growing Meetings, Incentives, Conferences and Exhibitions (MICE) segment; and, an increasing fondness among millennial to travel along with favorable policy initiatives by the government.
- On back of positive sentiments and expected further pickup in domestic travel and MICE led by social and industrial activities, **we expect the momentum to pick up and the industry to register a growth of about 6-8% in revenues for FY20.**
- The expected future inventory in 11 major markets (across categories - only branded) is lower at around 50,170 rooms for the next 5 years (FY19 to FY24). Therefore, with increasing demand on back of improvement in economic activities and lower room additions, **we expect the major markets in the industry to sustain the average room rates (ARRs) going forward and grow at an average of 3.5-4.5% per annum. Also, we expect the occupancy to inch up to an average of about 68-70% by the end of FY22 compared with 66.7% in FY19.**
- **Accordingly, the hotels industry is expected to see an increase in room revenue at the rate of about 10-12% CAGR over the next 3 years.**
- The sector also faces several challenges in terms of complex regulatory environment and inadequate tourism infrastructure.
- Goods and Services Tax (GST) has been implemented from July 1, 2017, with the aim of replacing the indirect taxes on all goods and services. In September 2019, the GST for hotel accommodation with room tariff above Rs 7,500 has been revised to 18% from the earlier rate of 28%. Rooms with tariffs between Rs 1,000 and Rs 7,500 will now attract GST of 12% while that below Rs 1,000 have been exempt from any GST. Accordingly, we at CARE Ratings believe that the effective tax rate is expected to provide some impetus to the hotel industry in terms of average room rates going forward.

Annexure
Hotels - Star Category Classification

Criteria	1 & 2 Star	3 Star	4 Star	5 Star & 5-D	Comments
General					
24 hour lifts for buildings higher than ground plus two floors	N	N	N	N	Mandatory for all hotels. Local laws may require a relaxation of this condition. Easy access for differently abled guests
All floor surfaces clean and in good shape	N	N	N	N	Floor may be of any type Should be adequate in relation to the number of rooms & banquet / convention hall capacities.
Parking facilities	D	N	N	N	Exclusively earmarked accessible parking nearest to the entrance for differently abled guests
Guest Room					
Minimum size of bedroom excluding bathroom in sq. ft.	120	130	140	200	Single occupancy rooms may be 20 sq. ft. less. Rooms should not be less than the specified size.
Air-conditioning - % of Rooms	25%	50%	100%	100%	Air-conditioning / heating depends on climatic conditions & architecture. Room temp. Should be between 20c to 28c.
Suites	D	D	N	N	2% of room block with a minimum of 1 suite room
Minibar/Fridge	D	D	N	N	All 3 Star hotels shall have the facility of a mini fridge and all 4 Star, 5 Star and 5 Star deluxe shall have the facility of mini bar with effect from 1.4.2014. Contents must conform to local laws
Shelves/Drawer space	N	N	N	N	Necessary for hotels of 1, 2 & 3 Star category to have a wardrobe.
Wardrobe with minimum 4 clothes hangers per bedding	N	N	N	N	In 1 star or 2 star hotels this may be without doors
Sufficient lighting, 1 per bed	N	N	N	N	
A 5 amp earthed power socket	N	N	N	N	
A bedside table and drawer	N	N	N	N	1 per two twins and two for a double bed.
Opaque curtains or screening at all windows	N	N	N	N	All 4 Star, 5 Star and 5 Star deluxe hotels shall install blackout curtains by 1.4.2015

TV - cable if available		N	N	N	Mandatory for 3*, 4*, 5* and 5* Deluxe category and TV must have remote. Exception: For Eco and Nature Resort, TV Cable is not mandatory for 3*,4*,5*,5* Deluxe category. However, it is mandatory that they provide a Television with cable in lobby or other common area.
Bathroom					
Number of rooms with attached bathrooms	All	All	All	All	It will be mandatory w.e.f. 01.09.2010 for all 1 & 2 Star category hotels to have attached bathrooms. All bathrooms to have sanitary bin with lid
Minimum size of bathroom in sq ft	30	36	36	45	25% of bathroom in 1 & 2 Star hotels to have western style WC. No higher ceiling / cap on the maximum size
Guest toiletries to be provided - minimum 1 new soap per guest	N	N	N	N	Quality products depending on the star category
Bottled toiletry products to be provided	D	D	N	N	
Floors and walls to have non - porous surfaces	N	N	N	N	
All Star hotels shall provide water sprays or bidets or washlets or other modern water based post-toilet-paper hygiene facilities.	N	N	N	N	This condition shall be applicable to all new hotels that will start operating from 1.4.2016. For the hotels which have come into operation or will come into operation before 31.3.2016, these facilities will be mandatory from 1.4.2022.
Hot and cold running water available 24 hours	N	N	N	N	It will be mandatory w.e.f. 01.09.2010 for all 1 & 2 Star category hotels to provide hot & cold running water
Public Area					
Valet (Parking) services to be available	D	N	N	N	
Lounge or seating area in the lobby	N	N	N	N	Lobby shall have furniture and fixtures which shall include chairs /arm chairs, sofa, tables and fresh floral display.
Food & Beverage					
1 Star & 2 Star category					1 & 2 Star categories should have minimum one dining room serving all meals. Room service not necessary

3 Star category

One Multi-cuisine Restaurant cum Coffee Shop open from 7 a.m. to 11 p.m. and 24 hr. Room Service

Grade A cities:

One Multi Cuisine Restaurant cum coffee shop open from 7 a.m. to 11 p.m., one Specialty Restaurant and 24 hr. room service

Other than A cities:

One Multi Cuisine Restaurant cum Coffee Shop open from 7 a.m. to 11 p.m. and 24 hours . Room Service

Grade A cities:

One 24 hours Multi Cuisine Restaurant cum Coffee Shop, one Specialty Restaurant and 24 hours. Room Service.

Grade B cities:

One Multi Cuisine Restaurant cum Coffee Shop open from 7 a.m. to 11 p.m., and 24 hours. Room Service. One. Specialty Restaurant would be desirable

Other than A & B cities:

One Multi Cuisine Restaurant open from 7 a.m. to 11 p.m. and 24 hours Room Service.

Grade A cities:

One 24 hours Multi Cuisine Restaurant cum Coffee Shop, one Specialty Restaurant and 24 hours. Room Service.

Grade B cities:

One Multi Cuisine Restaurant cum Coffee Shop open from 7 a.m. to 11 p.m., and 24 hours. Room Service. One. Specialty Restaurant would be desirable

Other than A & B cities:

One Multi Cuisine Restaurant cum Coffee Shop open from 7 a.m. to 11 p.m. and 24 hours Room Service. One Specialty Restaurant would be desirable.

4 Star category (with alcohol service or with no alcohol service)

5 Star category (with alcohol service or with no alcohol service)

5 Star Deluxe category

Grade A: Delhi,** Mumbai, Kolkata, Chennai, Bangalore, Pune, Hyderabad, Secunderabad
 Grade B: Cities in the rest of the country excluding Grade 'A' cities
 Grade C: Cities in the rest of the country

Note: The Ministry of Tourism may review and revise the cities falling under the Grade 'A' – Grande 'B' from the time to time.
 **Delhi would include the hotels falling in Gurgaon, Faridabad, Ghaziabad, NOIDA, and Greater NOIDA”

Kitchen/Food Production Area

Refrigerator with deep freezer	N	N	N	N	Capacity based on size of F & B service
Segregated storage of Meat, fish and vegetables	N	N	N	N	Meat, fish and vegetables in separate freezers
Drinking water	N	N	N	N	Water treated with UV + filtration
Garbage to be segregated - wet and dry	N	N	N	N	To encourage recycling
Wet garbage area to be air-conditioned	D	N	N	N	

Guest Services

Iron and Iron Board facility	D	D	N	N	Iron and iron board to be made available on request in 1 to 3 Star category hotels on complimentary basis. For 4, 5, 5 Star Deluxe categories to be available in the room on complimentary basis. In house for 5 Star Deluxe hotels.
Dry- cleaning /laundry	D	D	D	N	For 5 Star category and below may be outsourced
Paid transportation on call	D	N	N	N	Guest should be able to travel from hotel
Acceptance of common credit cards and facility / infrastructure for accepting/ making payments by digital transactions.	N	N	N	N	
Wake - up call service on request	N	N	N	N	
Name Address and telephone numbers of doctors with front desk	N	N	N	N	
Newspapers available	D	D	N	N	This may be placed in the lounge for 1, 2 & 3 Star hotels
Stamps and mailing facilities	D	N	N	N	
Access to travel desk facilities	N	N	N	N	This need not be on the premise for 1, 2 & 3 Star categories
Health - Fitness facilities	D	D	D	N	Indian system of treatments should preferably be offered
Conference Facilities	D	D	D	N	
Safety & Security					
CCTV Cameras at strategic locations	N	N	N	N	
Smoke Detectors	N	N	N	N	These can be battery Operated

Utility shop / kiosk	D	D	D	N	The presence of a utility kiosk/shop will not be a mandatory condition for classification under one to four Star categories. For 5 Star & 5 Star Deluxe categories one utility kiosk or shop will be a must. No separate book shop shall be necessary
Metal detectors (door frame or hand held)	D	N	N	N	
Security arrangements for all hotel entrances	N	N	N	N	
Communication Facilities					All hotels in the categories 4 Star, 5 Star & 5 Star Deluxe shall provide a telephone within an arm's reach of the toilet seat. This condition shall be applicable to all new hotels that will start operating from 1.4.2016.
Telephone facility within arm's reach of the toilet seat.	D	D	N	N	
A telephone for incoming & outgoing calls in the room.	N	N	N	N	
PC available for guest use with internet access	D	N	N	N	4 star and above should have direct dialing and STD / ISD facilities. 1,2 and 3 Star category hotels may go through a telephone exchange
Swimming Pool	D	D	D	N	This can be a paid service. Up to 3 Star, PC can be in the executive offices, Internet subject to local access being available This can be relaxed for hill destinations. Mandatory to have trained Life Guard. Board containing Do's & Don'ts, No Diving sign, pool depth etc. should be displayed at a strategic location in the pool area All 4 Star, 5 Star and 5 Star Deluxe hotels shall provide a luminous LED wall clock with numerals of three inches or more on display near their swimming pools. It will be desirable for all 5 Star Deluxe hotels to have air-conditioned porches and heated swimming pools.

Note: D – Desired, N - Necessary
Source: Ministry of Tourism
